

**IF YOU DON'T HAVE FREE WI-FI, YOU ARE LOSING VALUABLE CUSTOMERS!
AND IF YOU ARE OFFERING FREE WI-FI, YOU SHOULD BE SHOWCASING YOUR BRAND!**

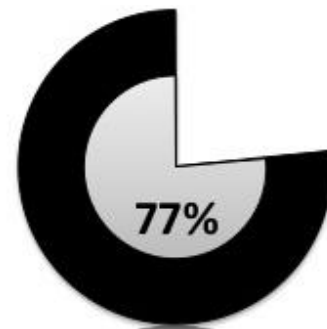

TABLETS ARE HUGE

86% of all tablets require a Wi-Fi connection to access the internet.

Wi-Fi IS EVERYWHERE

75% of smartphone owners use Wi-Fi on their devices.

Wi-Fi IS FOR EVERYONE

Even the "least" interested shoppers, age 45+, are over 77% influenced by in-store Wi-Fi availability

What Can IES Do For Your Business?

- **Custom brand your wi-fi**

We create a splash page that features your brand and program a redirect to your website after they connect.

- **Manage your network remotely in the cloud**

IES manages your network in the cloud for minimal (if any) down time.

- **Create up to 3 SSIDs**

Use one for a secure network, one for a free public network, and one for an upgraded paid network.

- **Control bandwidth**

Limit bandwidth to free users, give more bandwidth to paid users, and have no limits for your secure wi-fi.

- **Charge for wifi access**

Charge per hour, per day, per week, per month, or not at all – do it however you'd like!

- **Generate vouchers & timed limits**

Generate temporary passwords to give out that auto expire after any set amount of time.

- **Get reports**

See what applications are using your bandwidth and when your peak times are in near real time. And with user insights, you'll have full visibility into the devices on your network – and have the ability to restrict access.

Perfect for hotels, apartments, retail stores, restaurants, cafés, small and medium-sized businesses—and just about anywhere else!

We program the units for you - simply plug and play out of the box!
